

## TRANSBOTTLE

Whether you are producer, vendor, wine lover or boat/camping car owner, you often transport bottles. To make it easy, we've developed in France an essential "state-of-the art" bottle carrying device for 75 cl bottles and most of the 150 cl magnums. It is safe, practical and light, 3 good reasons to carry it in your hand.

### **EASY CARRYING**

With his adjustable shoulder strap, Transbottle 3 is the perfect bottling carrying device wherever you go by car, plane, boat, camping-car, metro, bicycle or on foot. The bottles won't knock against each.

### **IDEAL STOCKAGE**

It's less expensive than a wine cellar. An ideal solution, well shielded from light and temperature variations to conserve your bottles, especially if you don't have a cellar.

### **ISOTHERMAL**

The bottles your bring with you when invited remain cool. They stay at the correct temperature, ready for the perfect tasting.

## ACCESSORIES

You will always be ready for your tastings.

**Contains:** double lever corkscrew and 2 natural cork winestoppers

## IDENTITY CARD

<b>Dimensions</b>	Height : 39 cm    Width : 14 cm    Length : 41 cm
